

**Resilience +
Sustainability**
CITY OF NEW ORLEANS

Project Update: Drainage Pump Station (DPS) 01 Project- Phase I
May 8, 2026

**** WATER DISRUPTION ****

You may experience low or no water pressure in this area.
During this time, please find an alternative water supply.

The City of New Orleans' Office of Resilience & Sustainability contractor, RNGD Construction, LLC in conjunction with the Department of Public Works & the Sewerage and Water Board of New Orleans, will be performing a water valve closure to facilitate essential water valve repairs.

WHEN: Saturday, May 16, 2026, 8:30am - 5:30pm

WHERE: Orange Street (Magazine Ave to St Thomas St)
Annunciation St (Felicity St to Melpomene St)
Constance St (Felicity St to Melpomene St)
Felicity St (Magazine St to Chippewa St)
Race St (Annunciation St to Chippewa St)
Chippewa St (Orange St to Race St)

When water is restored, run your faucets for 5 minutes to flush out the lines before resuming regular use.

If water is not restored within one hour of the listed time, residents will be contacted by the Office of Resilience and Sustainability and Sewerage and Water Board of New Orleans via text messaging alert and/or community canvassing.

About the Project

This temporary inconvenience is part of the **\$39.6M DPS01 Watershed (Broadmoor HMGP) Drainage Upgrades and Green Infrastructure Project Phase I** with the City of New Orleans' Office of Resilience & Sustainability, in conjunction with the Department of Public Works and Sewerage and Water Board of New Orleans.

Once complete, residents will experience an overall improved quality of life as the project will alleviate flooding by increasing the capacity of subsurface drainage between local streets and trunk lines, as well as by using green infrastructure options which may include retention/detention basins, street basins, rain gardens, and street side bioswales. Phase 1 of the project is scheduled to be completed in Winter 2027.
